“ANALOGÍA SENSORIAL”

*Bold is my mind when I imagine. I enjoy the moment
with vertigo, closing my eyes and becoming intoxicated
by the sensations that blossom through my hands.*

*Thinking is my passion, thinking is creating,
it is loving what you dream.*

THE ESSENCE

Organic strokes, sculptural detail and minimalist lines. Following these premises when creating, pieces with a unique essence are obtained, in which materials, shapes and volumes are combined that end up coming together in a hypnotic creation.

The result is exquisitely beautiful. Sober yet elegant creations, with personality and unique character. There are no two alike.

LA DIVA

The balance between art and function manages to elevate us to an immersive experience. A visual perspective, through a message beyond an experience associated with the figurative.

Try to look at me, know Eden.

BELLA & LOLA

BELLA & LOLA

Emotion is perhaps the most important tool in design. Any great creation carries emotion and places rationality and functionality as equals, but not primary.

Im not perfect, im unique.

SANROSSÉ

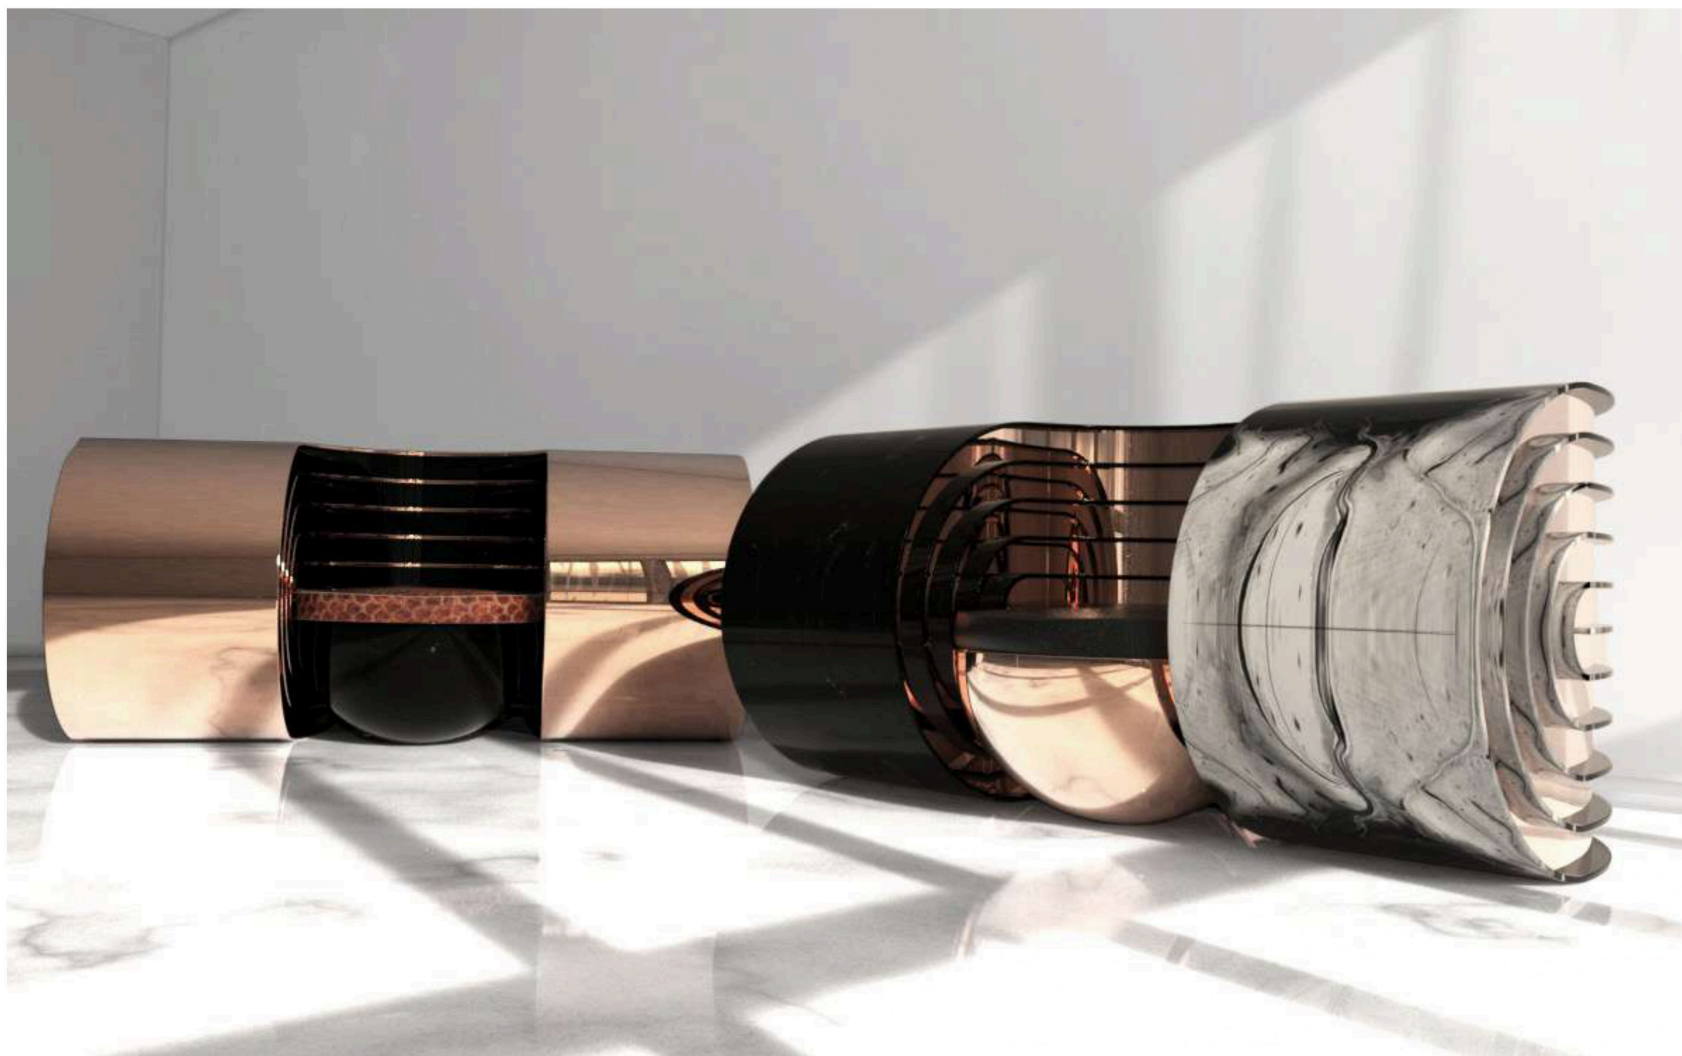

SANROSSÉ

Sensations and emotions come together and establish the main influence when creating visual stimuli. A sensory message beyond an experience associated with the figurative.

Don't blame yourself,
it's called Obsession.

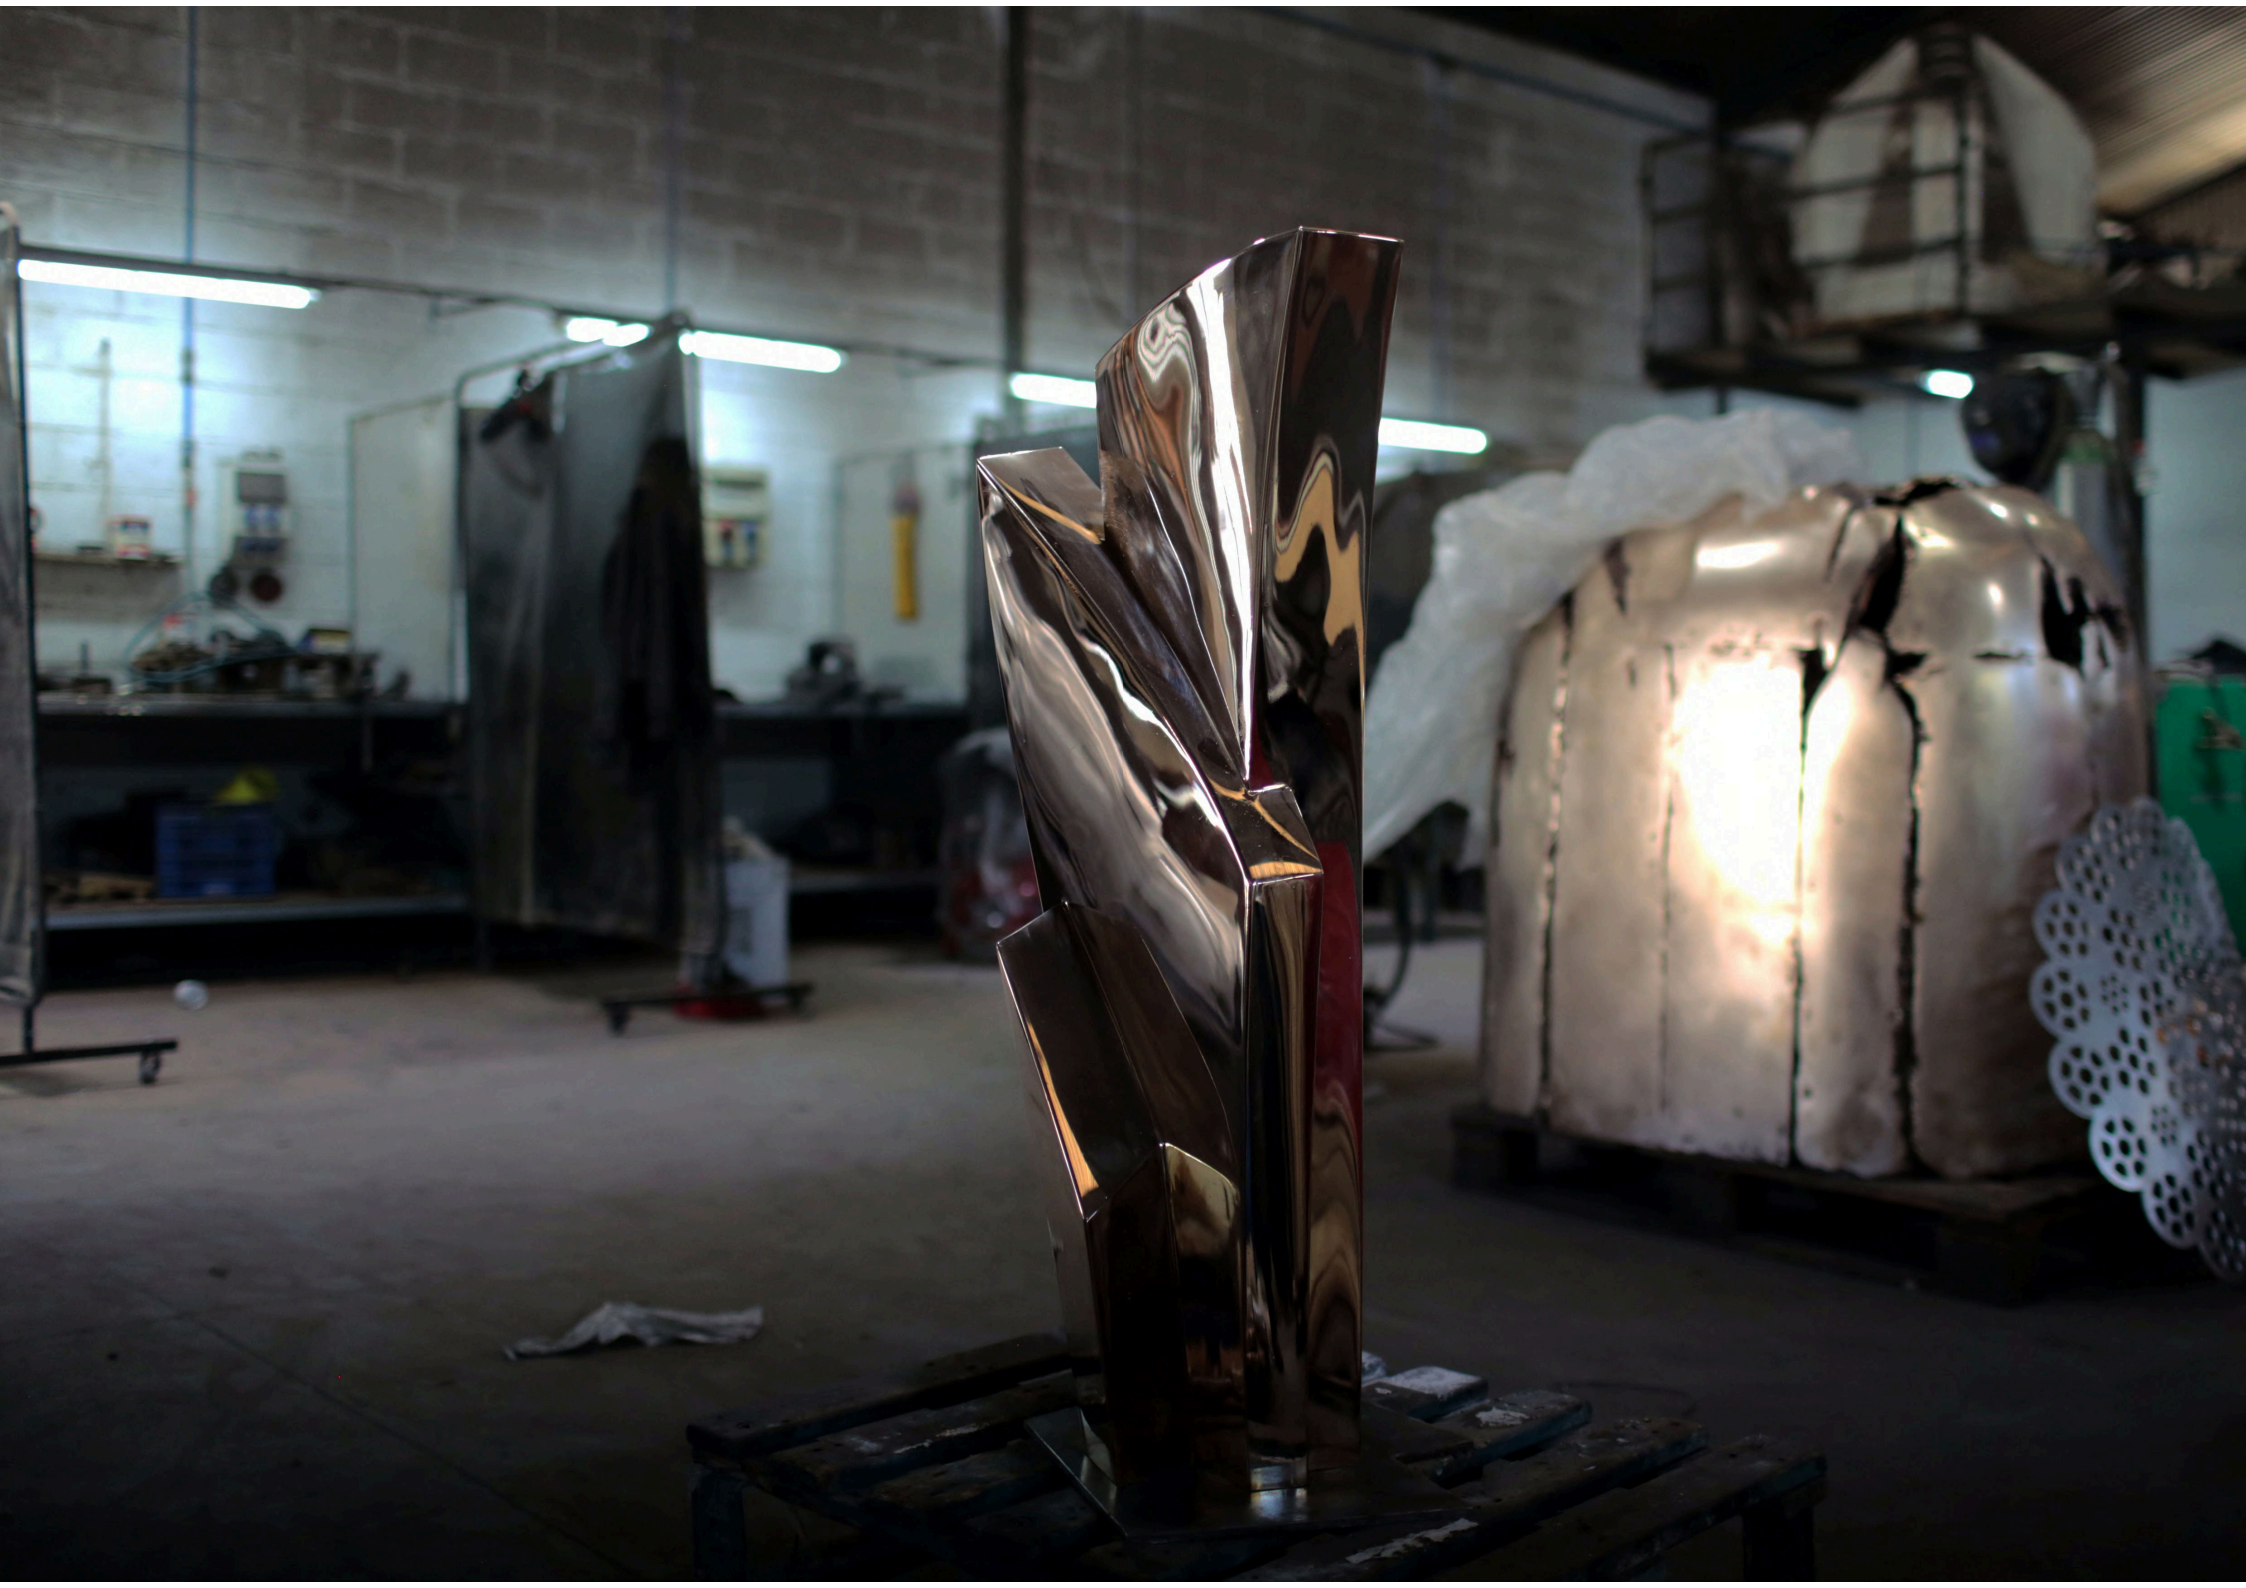

SILVANNA

Iconic piece of elegant sculptural beauty. Its dynamic lines and the tones that are born when the light hits it, manage to make you stop with their mere presence. Strange way to captivate your senses.

I am light and fire,
without adornments.
